

# *Human Population Growth – HW#1*

## *Human Population Growth*

- Log onto the following website and find the estimated total world population right now (in billions, to *two* decimal places):

<http://www.ibiblio.org/lunarbin/worldpop>

- What world population milestone was passed on or about Christmas Day (Dec. 25), 1986, according to that website?

Check out the *National POPClock* link at the bottom of the above web page to find out:

- What population milestone did the U.S. hit in Oct. 2006?
- What is the approximate (round to nearest million) U.S. population right now?
- Name and discuss *two* societal problems that this increasing population could/will produce. Give evidence or reasons why you believe this.
