

## ***Human Population Growth – HW#2***

- Log onto the following website and find the estimated total world population today (in billions, to two decimal places – e.g., 6.54):

<http://www.ibiblio.org/lunarbin/worldpop>

- What world population milestone (a milestone ends in *lots of zeroes*) was passed on or about Christmas Day (Dec. 25), 1986, according to that website?
- What population milestone did the U.S. hit on October 17, 2006? Do a web search and you'll find it...
- Name and discuss two societal problems that this increasing population could/will produce. Give evidence or reasons why you believe this is so.
