Robert Elling

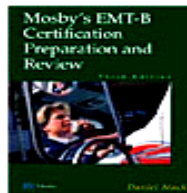

EMT-Achieve Basic Test Preparation is an exciting new program that enables students to practice test-taking online. Four 150-question tests contain questions across the major content areas - airway and breathing, cardiology, trauma, medical obstetrics and pediatrics, and operations - found in national and state exams. In addition, each of the 6 content areas has two 25-question tests. Once users have taken the test they can see their results, targeting areas of improvement. Before going on to another test, they can have quizzes in each of the content areas. All test questions have rationales and are reinforced with text, photos, illustrations, or video clips.
