

Why are these numbers different?

The Enrollment Comparison Report is produced out of the A&R office and is populated every night with data from SIS. The Enrollment Monitoring Report is produced out of the CRS office and is populated from a SIS extract that always occurs on Friday night. When the day of the week that the semester starts on varies (in 2010 spring semester starts on a Saturday and in 2009 spring semester started on a Tuesday), the A&R report will be comparing different days of the week to each other (comparing a Thursday to a Sunday) because their report is focused on comparing days before the semester start. The CRS report will always come from Friday data and is more focused on comparing weeks before the semester start. Consequently the two reports don't always show the same data which can result in discrepancies.
